Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.   (Currently Amended) A wireless computing apparatus having:

a processor; and

a memory comprising computer executable instructions which, upon execution are operative to cause the wireless computing apparatus to:

       request available updates;

       receive, in response to said request, an update catalog ~~for~~ of available updates, ~~said update catalog~~the available updates comprising available discretionary updates;

       receive, with the update catalog, ~~any~~ mandatory updates;

       ~~automatically~~ install the received mandatory updates;

       determine that a first group ~~relevance~~ of the available discretionary updates is relevant to the wireless computing apparatus, and that a second group of the available discretionary updates is irrelevant to the wireless computing apparatus; and

       depict representations of ~~any relevant~~ the available discretionary updates of the first group in a selectable manner to enable user control over installation of the relevant discretionary updates.

2.   (Currently Amended) The apparatus of Claim 1, the executable instructions further operative, upon execution, to cause the wireless computing apparatus to select a desired discretionary update from said ~~depicted relevant discretionary updates~~first group; and to obtain said desired discretionary update.

3.	(Currently Amended) The apparatus of Claim 2, the executable instructions further operative, upon execution, to cause the wireless computing apparatus to install said obtained discretionary update.

4.	(Currently Amended) The apparatus of Claim 1, wherein said relevance of the discretionary updates is determined from a current state of the apparatussecond group comprises an available discretionary update currently installed on the wireless computing apparatus.

5.	(Currently Amended) The apparatus of Claim [[4]]1, wherein said current statesecond group comprises an available discretionary update inapplicable to the software currently installed softwareon the wireless computing apparatus.

6-9	(Cancelled)

10.	(Currently Amended) A method of updating data on a wireless mobile device, the method comprising:

requesting available updates by the wireless mobile device;

receiving by the wireless mobile device, in response to said requesting, an update catalog for available updates, said update catalog comprising available discretionary updates and available mandatory updates;

receiving by the wireless mobile device, with the update catalog, any a mandatory update[[s]];

automatically installing by the wireless mobile device the received mandatory update[[s]];

determining by the wireless mobile device relevance that a first group of the discretionary updates is compatible with, and is not currently installed on, the wireless computing apparatus, and that a second group of the available discretionary updates is incompatible with, or is currently installed on, the wireless computing apparatus; and

depicting by the wireless mobile device any the availablerelevant discretionary updates of the first group in a selectable manner to enable user control over installation of the relevant discretionary updates.

11.   (Currently Amended) The method of Claim 10, wherein said determining ~~further~~ comprises comparing, by the wireless mobile device~~,~~ the update catalog to software currently installed on the wireless mobile device, wherein the software is at least one of an operating system or an application.

12.   (Currently Amended) The method of Claim 10, further comprising selecting, by the wireless mobile device, a desired discretionary update from said ~~depicted relevant discretionary updates~~first group; and

obtaining said discretionary update.

13-29   (Cancelled)
